Application seminars have always been an important part of Ingersoll Cutting Tools customer service & our Die & Mold Seminar is no different. We believe that properly applying cutting tools is just as important as building quality cutting tool products. Our Die & Mold Seminars place special focus on proper tool selection and the application of the latest cutting tool technologies. This seminar is designed for the Die and Mold industry and the unique machining challenges in that industry.

What To Expect

Through group discussions, presentations and machine demos, seminar attendees are exposed to a wide range of metal cutting technologies.

- Cutting Tool Selection
- Grades and Coatings
- Carbide Failure Modes
- Product Offerings
- Features & Benefits
- Feed/Speed Calculations
- Special emphasis on Typhoon coolant-driven high-speed spindles
- Rough Milling, Semi-Fin & Finishing
- Drilling, Boring, Reaming & Threading
- Programming Considerations & Tips
- Interactive Programming Demo
- High Feed Indexable Milling Review
- Heavily Focused on Productivity
