

T-Clamp goes Modular!

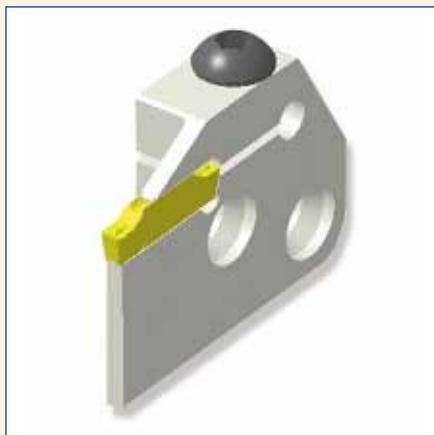

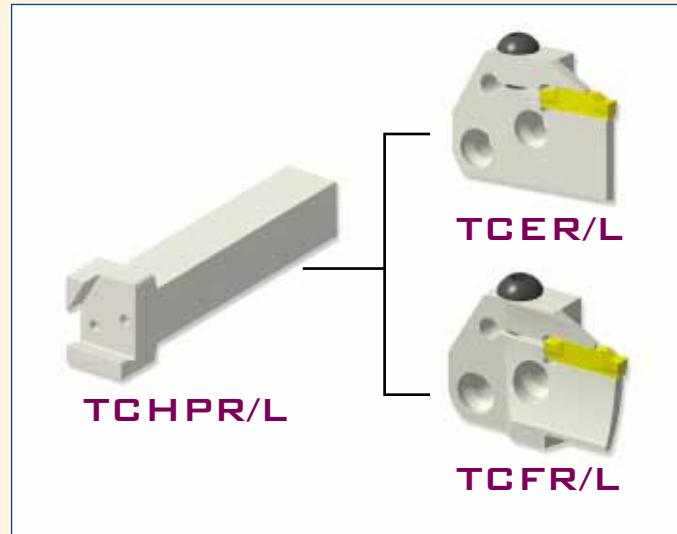

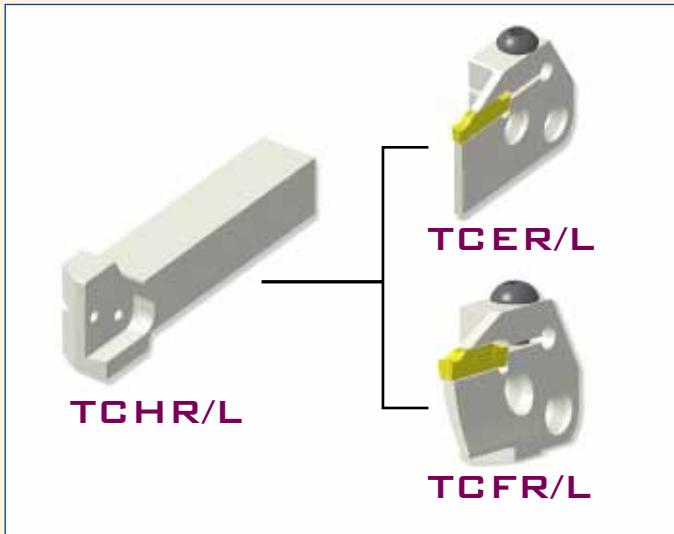

Increased flexibility and improved productivity with the new modular T-clamp design

The addition of modular adapters to the T-Clamp multifunction system will reduce costs and tooling requirements. The tool has the capacity to accept a wide range of adapters for many different external grooving, turning, parting off and face machining applications.

The adapters are made to use single or double end **T-Clamp Ultra Plus** inserts, and have a strong and precise pocket location with exceptional repeatability and performance on both high precision and heavy machining applications.

FEATURES

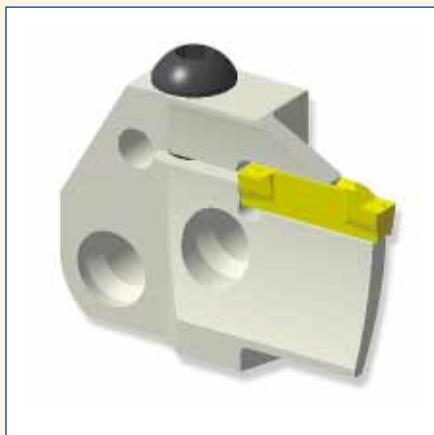

TCER/L and TCFR/L adapters can be mounted on both parallel and perpendicular holders.

TCER/L

RANGE OF INSERT

TCER/L: 3mm, 4mm, 5mm, 6mm, 8mm

TCFR/L

RANGE OF MACHINING DIAMETER

TCFR/L 3... : D1.57 inch - D7.87 inch

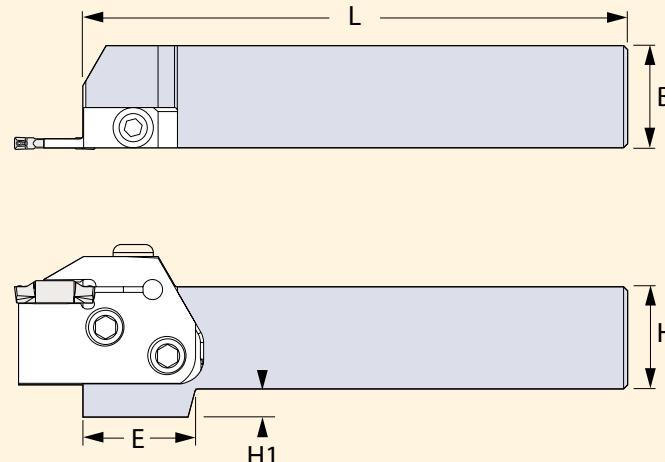

TCFR/L 4... : D1.97 inch - D9.84 inch

TCFR/L 5... : D2.17 inch - D11.81 inch

TCFR/L 6... : D2.36 inch - D15.75 inch
