

HIPOSTRIO™ 04 OPERATING GUIDELINES - SERIES 1K_1B

RPM Calculation

Calculation is to be made using the resultant diameter at ap.

Chip Thinning

Chip Thinning calculator is recommended to ensure hmax falls within fz range

Note: Feed and speed recommendations are starting operating parameters. They are only guidelines from which further optimization should take place. Operating parameters are influenced by many machining variables. These variables may cause for reductions in feeds and speed or dramatic increases. Additionally, DOC and WOC may need to be revised to optimize the tools performance.
